Eliott THOMAS

PhD Candidate in Document AI

PhD candidate in Document AI at La Rochelle University, researching table extraction in business documents under low-resource conditions. My work bridges academic research and industrial application through a CIFRE partnership with Yooz, with a focus on reducing the need for expensive labeled data. Beyond the technical challenges, I am increasingly interested in how AI can be deployed responsibly and used for meaningful societal impact.

Education

PhD in AI, CIFRE
La Rochelle University, L3i Lab, France Jan 2024 – Present
Industrial PhD in partnership with Yooz. Research on table extraction in business documents under limited labeled data regimes. 5 publications (3 accepted, 2 pending) at WACV and ICDAR.

Engineering Degree in CS + Master's in Data and AI
ENSSAT Lannion / Univ. de Sherbrooke, Canada 2019 – 2022
3-year programme at ENSSAT. Final year completed at Université de Sherbrooke under a dual-degree partnership, specialising in ML and data science. Both diplomas awarded at the end of the same year.

Classe Préparatoire (Maths Spé)
Dupuy de Lôme, Lorient, France 2017 – 2019
Intensive preparation in mathematics and physics for engineering school entrance.

Professional Experience

Research Engineer, Yooz (CIFRE PhD)
Yooz / L3i Lab, La Rochelle, France Jan 2024 – Present
Conducted research on table extraction in business documents, producing **5 publications** at WACV and ICDAR. Methods span zero-shot correction, pseudo-labeling, active learning for pipeline models, and custom loss design.

Research Engineer, Labcom IDEAS
L3i Lab, La Rochelle, France Jan 2023 – Dec 2023
Information extraction from business documents. Contributed to **2 publications** at ICDAR 2023 on key-value extraction and subgraph-based retrieval.

Teaching Assistant
EIGSI and La Rochelle University, France Jan 2023 – Present

- *Machine Learning 2*, EIGSI (2024, 2025): M2 students over 2 years
- *Introduction to Web*, La Rochelle University (2026): L2 students
- *Computer Science (CM/TD/TP)*, La Rochelle University (2023): L1 students

Final Year Research Project
LITIS Lab, Rouen, France May – Dec 2022
Multi-label classification of French tweets following industrial disasters. Fine-tuned BERT-like models on a dataset of several hundred tweets gathered and annotated by the team.

Publications

- **WACV 2026** *Zero-Shot Table Extraction in Business Documents: A Unified Benchmark with Error Taxonomy and Ecological Analysis*
- **ICDAR 2025** *QUEST: Quality-aware Semi-supervised Table Extraction for Business Documents*
- **WACV 2025** *RAPTOR: Refined Approach for Product Table Object Recognition*
- **ICDAR 2023** *SETI: Subgraph-Induced Extraction Technique for Information from Administrative Documents*
- **ICDAR 2023** *Extracting Key-Value Pairs in Business Documents*

Technical Skills

Research / AI
Object detection, table extraction, semi-supervised learning, active learning, zero-shot learning, transformers, NLP, HuggingFace, fine-tuning

Engineering
Python, R, SQL, PyTorch, scikit-learn, Docker, LaTeX, Git, Linux, SSH, HPC remote computing

Languages

French Native
English C1
Spanish B1

Responsibilities

- **2025 – Present**: Member, University Research Commission, La Rochelle University
- **2025**: Treasurer, ADocs (doctoral students association)
- **2024**: Vice President, ADocs
- **2023 – Present**: Administrator, HPC computing server, L3i Lab
- **2020 – 2021**: Treasurer, TSEL (Student Sports Tournament)
- **2016 – 2017**: President, Student Life Council

Interests

Running, Fitness, Cinema, Badminton
